HELPING TO REINFORCE THEIR  
**DEFENSES AND NATURAL BARRIERS**

---

with

**SCIENTIFICALLY PROVEN INGREDIENTS**

# ADVANCE ACTIVE DEFENSE FOOD HELPS YOUR DOG'S NATURAL DEFENCES AND BARRIERS

- Our exclusive formula is made up of **immunoglobulins** and **natural polyphenols** that contribute to the proper functioning of the immune system.
- In the intestine, **immunoglobulins** neutralise foreign bodies such as viruses and bacteria, while **natural polyphenols** help immune cells by neutralising free radicals.
- This way, by caring for them from the inside with the right food, you'll ensure that your dog or cat stays happy and healthy.

# DIETS

Functional ingredients clinically tested to treat pets with pathologies.

# ADVANCE VETERINARY DIETS DOG

## GASTROENTERIC

### INTESTINAL PROTECTION

Contributes to enhanced intestinal health, improved digestion of food and optimal absorption of nutrients thanks to bioactive and hydrolysed plasma proteins with inulin and rice.

### EASY DIGESTION

With the absorbent properties of clay, and highly digestible rice.

### STOOL CONTROL

The optimal digestibility of MCTs (Medium-Chain Triglycerides) and high glutamine content offer an excellent source of energy, which is rapidly available while neutralising bacteria and maintaining the health of the intestinal mucosa.

**GASTROENTERIC**  
3kg · 12kg

## HYPOALLERGENIC

### 100% HYDROLYSED PROTEIN

Hydrolysed soy protein, a major source of protein, with a very low molecular weight. Prevents allergic reactions caused by proteins with high molecular weights that exceed the antigen threshold.

### PURIFIED STARCH

Maize starch, with no protein residues. Prevents allergic reactions caused by cereal protein residues.

### HIGH DIGESTIBILITY

Facilitates digestion in animals suffering from enteropathies and gastrointestinal problems.

**HYPOALLERGENIC**  
2.5kg · 10 kg

## ATOPIC

### REDUCES ITCHING

Helps to reduce the inflammation associated with atopic dermatitis thanks to omega-3 essential fatty acids.

### RESTORES THE SKIN BARRIER

Contributes to maintaining a healthy skin and glossy coat thanks to linoleic acid and aloe vera. Collagen peptides in the formula contribute to skin healing, while zinc and yeast support skin regeneration.

### CONTROLS ATOPIC OUTBREAKS

Reduces the risk of allergic reactions thanks to new sources of protein: trout and potato.

### FORMULATED WITHOUT CEREALS

### RABBIT AS THE SOLE SOURCE OF ANIMAL PROTEIN

Reduces the risk of adverse reactions associated with food.

### RESTORES THE SKIN BARRIER

Contributes to maintaining a healthy skin and glossy coat thanks to linoleic acid and aloe vera. Collagen peptides in the formula contribute to skin healing, while zinc and yeast support skin regeneration.

## with TROUT

**ATOPIC MINI**  
1.5kg · 7.5kg

**ATOPIC MEDIUM MAXI**  
3kg · 12kg

## with RABBIT AND PEAS

**ATOPIC MEDIUM MAXI**  
3kg · 12kg

# ADVANCE VETERINARY DIETS DOG

## WEIGHT BALANCE

### 85% OF DOGS LOSE WEIGHT IN 2 MONTHS\*

Helps dogs to stay in peak condition by reducing excess weight thanks to a low-calorie formula, rich in proteins.

*\*Clinical study. Internal data.*

### 30% LOSS OF BODY FAT IN 2 MONTHS\*

The optimal digestibility of MCTs (Medium-Chain Triglycerides) and the high absorption of fats create an energy source that is rapidly available.

*\*Clinical study. Internal data.*

### L-CARNITINE

Helps to reduce fatty deposits.

### 94% OF DOGS LOSE WEIGHT IN 2 MONTHS\*

Helps dogs to stay in peak condition by reducing excess weight thanks to a low-calorie formula, rich in proteins.

*\*Clinical study. Internal data.*

### 44% LOSS OF BODY FAT IN 3 MONTHS\*

The optimal digestibility of MCTs (Medium-Chain Triglycerides) and the high absorption of fats create an energy source that is rapidly available.

*\*Clinical study. Internal data.*

### L-CARNITINE

Helps to reduce fatty deposits.

## MINI 1-10 kg

### WEIGHT BALANCE MINI

1.5kg · 7.5kg

## MEDIUM-MAXI +10kg

### WEIGHT BALANCE MEDIUM-MAXI

3kg · 12kg

## ARTICULAR

### 82% OF DOGS HAVE IMPROVED MOBILITY IN 2 MONTHS\*

\*Clinical study. Internal data.

### JOINT MOBILITY AND CARTILAGE PROTECTION

Helps to prevent synovitis and to reduce joint pain thanks to hyaluronic acid. Omega-3, glucosamine and chondroitin help to strengthen cartilage and hydrolysed collagen can help to protect joints.

### BONE PROTECTION

Reduces the risk of fractures and osteoarthritis, as well as a loss in bone density, by boosting bone mineralisation and cartilage calcification through nutrition enriched with vitamin K2.

### 66% OF DOGS HAVE IMPROVED MOBILITY IN 2 MONTHS\*

\*Clinical study. Internal data.

### PRO-AGE COMPLEX WITH ANTIOXIDANTS AND LOW PHOSPHORUS CONTENT

Helps to reduce certain problems that arise with age, such as the loss of muscle mass, cognitive function and renal insufficiency.

### IMPROVES MUSCLE MASS

Extracts of lemon verbena and leucine. Supports antioxidant action and regenerates muscle mass.

### WEIGHT REDUCTION

Helps to reduce excess weight in dogs by reducing calorie content.

### JOINT MOBILITY AND CARTILAGE PROTECTION

Helps to prevent synovitis and to reduce joint pain thanks to hyaluronic acid. Omega-3, glucosamine and chondroitin help to strengthen cartilage and hydrolysed collagen can help to protect joints.

### BONE PROTECTION

Reduces the risk of fractures and osteoarthritis, as well as a loss in bone density, by boosting bone mineralisation and cartilage calcification through nutrition enriched with vitamin K2.

**ARTICULAR**

3kg · 12kg

## REDUCE CALORIE

**ARTICULAR REDUCE CALORIE**  
3kg · 12kg

# ADVANCE VETERINARY DIETS DOG

## DIABETES

### GLUCOSE CONTROL

Reduces postprandial glycaemia thanks to its high content in glucides.

### FIRM STOOLS

The soluble fibres contribute to colon health and regulate intestinal transit.

### LOW CALORIE

The low-fat, low-calorie formula helps to reduce excess weight and keep your pet in peak condition.

**DIABETES**  
3kg · 12kg

## RENAL

### ACIDOSIS CONTROL

Prevents the formation and recurrence of oxalate kidney stones and renal insufficiency by promoting a neutral pH and low phosphorus content.

### GLOMERULAR PROTECTION

Helps to control glomerular hypertension due to the presence of omega-3 fatty acids.

### RENAL WORKLOAD REDUCTION

Compensates and regulates kidney impairment thanks to a low sodium content.

**RENAL**  
3kg · 12kg

## URINARY

### CONTROLLED MINERAL LEVELS

To help reduce saturation of urine (RSS) and the risk of stone formation.

### LOW URINARY pH

to help dissolve struvite stones and reduce recurrence.

### REDUCED PROTEIN LEVEL

To help limit the growth of bacteria that use urea which comes from protein.

**URINARY**

3kg · 12kg

## URINARY LOW PURINE

### SUPPORTS A PROPER IMMUNE SYSTEM FUNCTION

Contributes to the correct functioning of the immune system.

### HELPS MAINTAIN SKIN AND COAT HEALTH

Omega 3 and 6, biotin and zinc help to maintain skin and fur health.

### LOW PHOSPHORUS AND MODERATE PROTEIN FOR CORRECT KIDNEY FUNCTION

Contributes to correct renal function.

**URINARY LOW PURINE**

12kg

# ADVANCE VETERINARY DIETS CAT

## GASTROENTERIC

### INTESTINAL PROTECTION AND EASY DIGESTION

Contributes to enhanced intestinal health, improved digestion of food and optimal absorption of nutrients thanks to bioactive and hydrolysed plasma proteins with inulin and rice.

### STOOL CONTROL

The optimal digestibility of MCTs (Medium-Chain Triglycerides) and the high glutamine content offer an excellent source of energy, which is rapidly available while neutralising bacteria and maintaining the health of the intestinal mucosa.

### REDUCES THE RISK OF FOOD INTOLERANCE

Produces an anti-inflammatory effect on the intestines and contributes to enhanced regulation of the immune system thanks to long-chain omega-3 fatty acids.

**GASTROENTERIC SENSITIVE**  
400g · 1.5kg

## HYPOALLERGENIC

### 100% HYDROLYSED PROTEIN AND PURIFIED STARCH SOURCE

Prevents allergic reactions caused by proteins with a molecular weight that exceeds the antigenic threshold.

### HELPS MAINTAIN HEALTHY SKIN BARRIER

With Omega 3 & 6 and zinc which help to maintain healthy skin.

### HIGH DIGESTIBILITY

Contributes to good nutrient absorption.

**HYPOALLERGENIC**  
1.25kg

## WEIGHT BALANCE

### 83% OF CATS REDUCE THEIR WEIGHT

IN 3 MONTHS\*

Helps cats to stay in tip-top condition by reducing excess weight thanks to a low-calorie formula, rich in proteins. *\*Clinical study. Internal data.*

### HIGH FIBRE CONTENT

Creates the feeling of satiety.

### 23% LOSS OF BODY FAT IN 3 MONTHS\*

The optimal digestibility of MCTs (Medium-Chain Triglycerides) and the high absorption of fats create an energy source that is rapidly available. *\*Clinical study. Internal data.*

### WEIGHT BALANCE

1.5kg · 3kg · 8kg

## URINARY CONDITION

### RENAL

### REDUCES THE WORKLOAD OF THE KIDNEYS

Facilitates renal function and maintains muscle mass.

### DELAYS THE PROGRESSION OF KIDNEY DISORDERS

Prevents the formation and recurrence of oxalate kidney stones and renal insufficiency by promoting a neutral pH and low phosphorus content.

### PH CONTROL

Helps to prevent the formation of oxalate kidney stones.

### RENAL

1.5kg

## URINARY

### CRYSTALLISATION INHIBITORS

Moderate level of magnesium and minerals. Prevents the formation of oxalate kidney stones.

### DILUTION OF URINE

Prevents deficiencies related to diuretic treatments and maintains an optimal level of potassium.

### REDUCES THE FORMATION OF STRUVITE CRYSTALS

Reduces the formation of struvite stones thanks to a low phosphorus content and low urine pH levels.

**URINARY**  
400g · 1.5kg · 3kg · 8kg

## STERILIZED - LOW CALORIE

### HELPS TO CONTROL WEIGHT

Moderate energy and high fibre content.

### PHYTATES AND CITRATE

Inhibits the formation of crystals in the urinary tract.

### HELPS TO PROTECT THE URINARY BARRIER FUNCTION

Glucosamine and chondroitin. Helps to protect the correct functioning of the urinary epithelium.

**URINARY STERILIZED LOW CALORIE**  
1.25kg · 2.5kg · 7.5kg

### HELPS TO REDUCE STRESS

Lemon balm, fish peptides and tryptophan. Helps to reduce stress, a factor that leads to idiopathic feline cystitis, spraying and urination in inappropriate places.

### ANTIOXIDANT VITAMIN E

Contributes to protecting cells that combat oxidative stress.

### CITRATE

Inhibits the formation of crystals in the urinary tract.

## STRESS

**URINARY STRESS**  
1.25kg
