**scientific
remedies**

We are a **multinational pharmaceutical** company and offer a full range of high-quality solutions for the daily care and well-being of people and pets all around the world. We promote well-being and the continual improvement of **health management**, **innovation**, and **technology** in order to stay one step ahead and adapt to the future by offering innovative health and/or nutritional formulas.

At present, **OPKO**, with its headquarters in Miami, is present in more than 52 countries with its Human Health and Animal Health brands:

Pharmacovigilance Department:

Dedicated to evaluating and preventing possible adverse effects and any issues related to such effects. This guarantees vigilance throughout the product shelf life.

Commitment

To maintain a strong commitment with veterinarians and pet owners, providing innovative solutions with unique all-round formulas containing natural ingredients.

Vision

To provide effective, innovative solutions that make day-to-day veterinary practice easier and so improve the quality of life of the animals that benefit from them.

Highly skilled and motivated team

Working under the same responsibility code, always prioritizing evidence and the efficacy of their products.

Social commitment and commitment to animals

We have the great satisfaction of collaborating with organizations like the ONCE Foundation for Guide Dogs and the Iberian Lynx Ex-situ Conservation Program in Spain.

No outsourcing

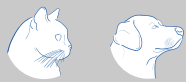

We are pioneers in the research and development of nutraceutical and zoosanitary products for animal health, which are made in Spain.

Quality assured

High quality standards are a strategic pillar for us. At present, our products are manufactured subject to international good manufacturing practice standards.

HYALORAL[®] LARGE AND GIANT BREEDS

An all-round formula with added nutrients to supplement the usual diet and help joints, tendons, and ligaments to develop correctly and stay healthy

Ingredients

- Hyaluronic acid **20.0 mg**
- Enzymatic hydrolyzed collagen **2.20 g**
- Glucosamine **313 mg**
- Chondroitin sulfate **200 mg**
- Gamma oryzanol **100 mg**

Indications

- Hyaloral[®]** large and giant breeds provides nutrients for
- Treating and preventing hip and elbow dysplasia
 - Providing daily supplementation to guide dogs to prevent joint problems
 - Slowing the progression of osteoarthritis
 - Preventing joint pain and injuries in cases of hereditary predisposition or joint overload (accelerated growth, intense exercises)
 - Enhancing the strength and flexibility of tendons and ligaments
 - Supporting recovery after immobilization or joint surgery

FEATURES

Enzymatically hydrolysed collagen - Preserves the peptides that contribute to the formation of new collagen, the main component of the cartilage that helps to maintain the structure of the joint.

Hyaluronic Acid - Main component of synovial fluid. Promotes the nutrition of cartilage.

Glucosamine- Amino sugar that is the precursor to components of joint cartilage. Promotes the nutrition of cartilage and joint function.

Chondroitin sulphate- Essential component of the joint cartilage. Promotes the nutrition of cartilage and joint function

Gamma oryzanol - Mitigates oxidative damage and inflammation within joints through its powerful anti-inflammatory, immuno-modulatory, and antioxidant properties.

Dosage :

Dogs:

- 1 tablet per 20 kg body weight a day in a single dose.

Presentation
50 ML

DAFORTE[®]

Formula containing nutrients that help dog and cats to recover from one-off imbalances in the gut

Ingredients

- Fructo-oligosaccharides (FOS) **98.0 mg**
- Brewer's yeast (MOS) **98.0 mg**
- Attapulgit **19.5 mg**
- Enterococcus faecium **2.00 x 10⁸ CFU**
- Potassium chloride **9.00 mg**
- Sodium chloride **1.50 mg**
- Zinc **0.35 mg**

Indications

Daforte[®] provides nutrients for

- Control of acute diarrhoea
- Diarrhoea of viral, bacterial or parasitic origin
- Post-treatment in viral infections
- Diarrhoea caused by treatment with antibiotics, stress, change of diet, etc.

FEATURES :

Attapulgit - Non-absorbable compound, which is able to retain bacteria and toxins in addition to reducing water loss, thus minimizing the severity and duration of diarrhea, and associated dehydration.

Prebiotics - Fructooligosaccharides (FOS) and mannan oligosaccharides (MOS) help to selectively stimulate the growth and/or activity of certain beneficial bacteria in the colon, such as bifidobacteria, improving the intestinal and immune health of the host.

Potassium - Reduces chances of hypokalemia.

Zinc - Prevents electrolyte loss, stimulates the growth and differentiation of enterocytes, reduces intestinal permeability and positively regulates oxidative stress and inflammation.

Probiotics such as Enterococcus faecium - Help to inhibit colonization of pathogenic microorganisms, rebalance intestinal microflora and promote a healthy intestinal immune response.

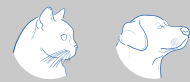

Dosage :

Cats:

- Kittens (up to 5 kg of body weight): 2 ml a day.
- Adult cats (5–10 kg of body weight): 4 ml a day.

Dogs:

- Up to 5 kg of body weight: 2 ml a day.
- 5–10 kg of body weight: 4 ml a day.
- 10–20 kg of body weight: 8 ml a day.
- From 20 kg of body weight: 10 ml a day.

Box of 30 Sachets

DIGEST PLASMORAL® Large and giant breeds

Innovative formula containing nutrients obtained from plasma as well other nutrients which help in the case of long-term gut imbalance by contributing to a normal immune response in the gut and aiding recovery.

Ingredients

- Fructo-oligosaccharide s (FOS) **900 mg**
- Mannan-oligosaccharides (MOS) **900 mg**
- Plasma proteins **60.0 mg**
- Enterococcus faecium protein **4.80 mg**
- Zinc **3.00 mg**
- Selenium **60.0 µg**
- Vitamin B12 **37.5 µg**

Indications

Plasmoral® Digest Large and giant breeds provides nutrients that help with:

1. Chronic diarrhea associated with:
 - Vaccination
 - Treatment with antibiotics
 - Changes of diet
 - Stress
2. Gut disorders
3. Sensitive or weakened gastrointestinal system

FEATURES

Plasmoral®- Plasma protein complex rich in bioactive proteins, minerals and vitamins, which helps to rebalance the functionalities and the structural properties of the intestinal mucosa and to promote correct intestinal immunity.

Prebiotic (FOS and MOS) and probiotic (Enterococcus faecium) - Promote a normal, healthy intestinal function and microbial balance in cats and dogs.

Essential micronutrients (zinc and selenium) and vitamin (vitamin B12) -Antioxidant properties, helps to maintain the function of the membrane barrier and intestinal permeability.

Dosage :

Dogs:

- 20–30 kg of body weight: 1 sachet a day.
- > 30 kg of body weight: 2 sachets a day

IRCVET® TABLETS

Formula containing nutrients that help the kidney cells to function correctly.

Presentation
Box of 60 Tablets

Ingredients

- Calcium acetate **240 mg**
- Vitis vinifera leaves **102 mg**
- Resveratrol **100 mg**
- Artichoke extract **60.0 mg**
- Cynarine **3.00 mg**
- Lemon pulp **11.0 mg**
- Quercetin **10.00 mg**
- Vitamin B6 **1.30 mg**
- Folic acid **134 µg**
- Vitamin B12 **0.66 µg**

Indications

In case of Chronic Kidney Disease, it helps to:

- Reduce the amount of phosphorus in the diet of animals with kidney problems
- Nourish and protect kidney cells from oxidative stress.
- Normalize vitamin B complex deficiencies

FEATURES

Calcium acetate - Phosphorus chelating agent that helps to reduce the amount of phosphorus in the diet of animals with kidney problems.

Vitis vinifera leaves rich in resveratrol - Reduces inflammation and oxidative stress, controls hypertension / glomerular hypertension and checks proteinuria.

Artichoke extract rich in cynarin - Exhibits multiple benefits, including anti-inflammatory, antioxidant, antihypertensive actions, coupled with hepatoprotective and cardioprotective effects. Additionally, it also addresses gastrointestinal symptoms through its appetite stimulant, anti-emetic, and spasmolytic actions.

Lemon pulp rich in quercetin - Antioxidant and anti-inflammatory properties helps to nourish and protect kidney cells from oxidative stress and inflammation.

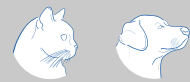

Folic acid, B9 and vitamins B6 and B12 - Helps to normalize vitamin deficiencies.

Dosage :

Cats: Half a tablet a day.

Dogs:

- Up to 10 kg of body weight: Half a tablet a day.
- 10–20 kg of body weight: 1 tablet a day.
- 20–30 kg of body weight: 1.5 tablets a day.
- Over 30 kg of body weight: 2 tablets a day.

IRCVET[®] GEL

Formula containing nutrients that help the kidney cells to function correctly.

Presentation
50 ML

Ingredients

- Calcium carbonate **45.0 mg**
- Calcium acetate **40.0 mg**
- Vitis vinifera leaves **25.4 mg**
Resveratrol **25.0mg**
- Potassium **19.0 mg**
- Artichoke extract **14.8 mg**
Cyanarin **740 µg**
- Salmon oil (source of Omega 3) **6.4 mg**
EPA **630 µg**
DHA **514 µg**
- Lemon pulp **2.75mg**
Quercetin **2.50 mg**
- Vitamin B6 **330 µg**
- Folic acid **36.0 µg**
- Vitamin B12 **0.190 µg**

Indications

- In case of Chronic Kidney Disease
- Reduce the amount of phosphorus in the diet of animals with kidney problems
 - Nourish and protect kidney cells from oxidative stress.
 - Normalize vitamin B complex deficiencies
 - Restore potassium levels in the body

FEATURES

Calcium carbonate and calcium acetate - Phosphorus chelating agent that helps to reduce the amount of phosphorus in the diet of animals with kidney problems.
Vitis vinifera leaves rich in resveratrol - Reduces inflammation and oxidative stress, controls hypertension / glomerular hypertension and checks proteinuria.
Artichoke extract rich in cyanarin - Exhibits multiple benefits including anti-inflammatory antioxidant antihypertensive actions coupled with hepatoprotective and cardioprotective effects. Additionally, it also addresses gastrointestinal symptoms through its appetite stimulant, anti-emetic, and spasmolytic actions.
Lemon pulp rich in quercetin - Antioxidant and anti-inflammatory properties helps to nourish and protect kidney cells from oxidative stress and inflammation.
Potassium - Helps to restore its levels in the body a mineral that is deficient in cats with kidney problems.
Folic acid and vitamins B6 and B12 - Helps to normalize vitamin deficiencies.

Dosage :

Cats:

- Up to 5 kg of body weight: 1 ml a day.
- Over 5 kg of body weight: 2 ml a day.

Ferrets, rodents: 0.2 ml/kg of body weight a day.
Mix with the usual food.

Dogs:

- 1 ml/5 kg of body weight a day.
- Over 35 kg of body weight: 8 ml a day.

Presentation
Box of 120 Tablets

CALMATONINE[®]

Formula with nutrients that help to regulate pet's behavior.

Ingredients

- Extract of valerian root **100 mg**
Valerenic acid **800 µg**
- Extract of Passiflora incarnata **100 mg**
Flavonoids **4.00 mg**
 - Tryptophan **120 mg**

Indications

- Calmatonine[®]** provides nutrients that help:
- In situations that may upset the animal: noise (fireworks, firecrackers, storms, etc.), changes to their everyday environment, change of habitat.
 - To regulate sleep.
 - To prevent feather-plucking by birds.

FEATURES

Valerian root extract (Valerenic acid) - Acts as CNS neurotransmitter inhibitor producing anti-anxiety effect.
Tryptophan - Serves as a precursor for serotonin, a neurotransmitter known for its anxiolytic properties and influence on behavior..
Passion flower extract - Contains flavanoids which help with relaxation by producing GABA mediated anxiolytic activity.

Dosage :

Occasional use: administer the product from 30 minutes to an hour before it is needed.

Continual use: the product can be taken continually for 6 months.

Cats: ½ to 1 tablet a day.

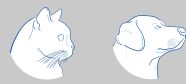

Dogs:

- Dogs up to 10 kg: ½ to 1 tablet a day.
- Dogs from 10-20 kg: 1 to 2 tablets a day.
- Dogs from 20-30 kg: 1½ to 3 tablets a day.
- Dogs from 30-40 kg: 2 to 4 tablets a day.
- Dogs over 40 kg: 3 to 6 tablets a day.

Ferrets, rodents, birds:

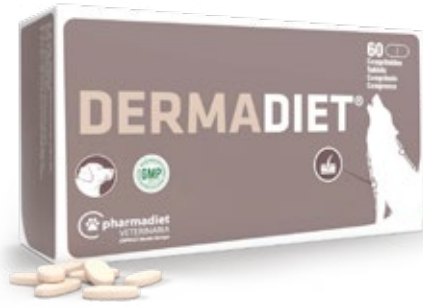

¼ tablet a day.

If you prefer, mix with the usual food. As this is a food supplement, it can be taken continually.

DERMADIET®

Formula containing nutrients that help keep dog's skin healthy and their fur stronger and shinier.

Presentation
Box of 60 Tablets

Ingredients

- Enzymatically hydrolyzed collagen **199 mg**
- Hydrolyzed fish collagen **199 mg**
- Omega 3 from Fish oil **20.9 mg**
- Niacinamide **10.0 mg**
- Calcium pantothenate **1.00 mg**
- Folic acid **1.00 mg**
- Vitamin B6 **273 µg**
- Vitamin B2 **266 µg**
- Vitamin B1 **183 µg**
- Zinc **714 µg**
- Biotin **9.95 µg**
- Vitamin B12 **0.11 µg**

Indications

- Dermadiet®** provides nutrients that help:
- Maintain healthy skin.
 - Deficiencies in essential nutrients for the skin and fur.
 - Dogs of Nordic breeds and dogs that grow rapidly and present a Zinc deficiency.
 - Fur loss.

FEATURES

Omega-3 fatty acids - A rich source of EPA and DHA, are known to enhance the skin and coat health by their potent anti-inflammatory properties.

Biotin (also known as vitamin B7) - Contributes to the maintenance of the skin and fur in normal conditions.

Enzymatically hydrolysed collagen of porcine origin and hydrolysed fish collagen - Easily absorbable form of collagen, which helps to the maintenance of skin and fur. Beneficial for dogs deficient in this protein.

B vitamins- Help to strengthen the skin and hair.

Zinc - Essential micronutrient that maintains skin health and prevents hair loss. It possesses antimicrobial properties as well as anti-inflammatory activities and promotes re-epithelialization and wound healing.

Dosage :

Dogs:

1 tablet/10 kg of body weight per day.

As it's a food supplement, it can be taken continually.

OLEODERM®

Formula with nutrients that help to keep dog's and cat's skin and fur healthy.

Presentation
Box of 60 Capsule

Ingredients

- Omega 3 **100 mg**
EPA **47.5 mg**
DHA **32.5 mg**
- Borage oil
Linoleic acid (omega 6 fatty acid) **95.0 mg**
Gamma linoleic acid (omega 3 fatty acid) **50.0 mg**
- Zinc **5.00 mg**
- Calcium pantothenate **1.90 mg**
- Vitamin B2 **286 µg**
- Vitamin B6 **285 µg**
- Vitamin B1 **233 µg**
- Folic acid **115 µg**
- Biotin **78.0 µg**
- Vitamin B12 **0.12 µg**

Indications

Oleoderm® provides nutrients that help to:

- Maintain skin function.
- Improve and keep dogs' and cats' skin and fur healthy.
- Reduce erythema and pruritis caused by dermal hypersensitivity caused by atopias, flea bites, adverse reactions to food/medication, dermatitis, etc.

FEATURES

Omega-3 fatty acids - A rich source of EPA and DHA, are known to enhance the skin and coat health by their potent anti-inflammatory properties

Omega 6 fatty acids- Increases ceramide synthesis which a major component of epidermis. Helps to restore the lipid barrier and prevent trans epidermal water loss and maintains hydration of skin.

B vitamins- Help to strengthen the skin and hair

Zinc - Essential micronutrient that maintains skin health and prevents hair loss. It possesses antimicrobial properties as well as anti-inflammatory activities and promotes re-epithelialization and wound healing.

Dosage :

Cats: 1 capsule every 2 days. **Dogs:**

Up to 10 kg of body weight: 1 capsule every 2 days.

From 10 to 15 kg of body weight: 1 capsule per day.

From 15 to 25 kg of body weight: 2 capsules per day.

From 25 to 35 kg of body weight: 3 capsules per day.

Over 35 kg of body weight: 4 capsules per day.

If you prefer, pour the content of a capsule in the animal regular feed.

As it's a food supplement, it can be taken continually.

LYSINVIRAL[®] PLUS

Formula containing nutrients that help the normal functioning of the immune system in cats.

Ingredients

- L-lysine **205 mg**
- Fish oil **44.8mg**
- EPA **15.0 mg**
- DHA **10.7mg**
- Oat bran **12.5mg**
- Beta-glucans **8.70 mg**
- Lemon pulp (provides quercetin) **880 µg**
- Enterococcus faecium **4.0 x 10⁸ CFU**

Indications

In cases of viral infections such as feline herpes virus (FHV-1), it helps to:

- Reduce the severity of clinical signs and symptoms
- Decrease the number of outbreaks in infected cats
- Reduce contagion capacity
- Boost the immune system

FEATURES

L-lysine- Produces antiviral action by reducing the viral replication. It acts as an antagonist of arginine, an amino acid required for FHV-1 replication.

E. Faecium and beta-glucans

- Boost the immune system, improving specific and non-specific immune response
- Help to balance intestinal microflora, reducing morbidity caused by infection

Quercetin and Omega-3

- Antioxidants reduces oxidative stress
- Modulate the synthesis of pro-inflammatory cytokines

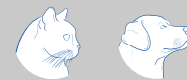

Dosage :

Kittens (under 6 months): 1-2 ml a day.

Cats (adults, over 6 months): 2-4 ml a day.

Shake before use. Take directly or well mixed into the regular food. Use for 2 to 3 weeks is recommended.

IMMUNITY PLASMORAL®

Presentation
Box of 60 Tablets

Innovative formula for cats and dogs based on nutrients that aid the normal functioning of the immune system, such as in situations of immunosuppression, pre- and post-vaccination and deworming, contributing to the animal's non-specific and specific immunity.

Ingredients

- Plasma proteins **350 mg**
Gamma globulins **25.9 mg**
- Oat bran **143 mg**
Beta-glucans **100 mg**
- Dry extract of Scutellaria
Baicalensis **50.0 mg**
Baicalin **40.0 mg**
- Ginseng **17.5 mg**
Ginsenosides **14.0 mg**
- Vitamin B6 **670 µg**
- Biotin **50.0 µg**
- Selenium **20.0 µg**
- Vitamin B12 **0.400 µg**

Indications

- Plasmoral®** Immunity provides nutrients to help the immune system by helping to combat:
- External aggressive agents.
 - Infectious processes of any nature, especially intracellular pathogens.
 - Stress, malnutrition.
 - Acquired immunosuppression:
 - Prolonged use of potentially immunosuppressive drugs.
 - Chemotherapy: before, during and after chemotherapy. Also, especially in, puppies:
 - Helps to improve the symptoms of vaccines.
 - Helps during pre- and post-vaccination periods

FEATURES

Plasmoral®- Plasma protein complex rich in bioactive proteins, minerals and vitamins, which helps to rebalance the functionalities and the structural properties of the intestinal mucosa and to promote correct intestinal immunity.

Beta-glucans

- Protective action against infections demonstrated in experimental studies: (Leishmania major, Candida albicans, Toxoplasma gondii, S. aureus, E. coli, Trypanosoma cruzi, etc.)
- Activate the innate immune system by increasing the activity of macrophages, neutrophils and dendritic cells, and the cytotoxicity of NK (natural killer) cells.***
- Indirect antitumor activity.

Ginsenosides

- Increase the destruction of intracellular pathogens (stimulating the differentiation of Th1 lymphocytes).
- Help to balance the physiological processes of stress.
- Reduce the titer of feline calicivirus.
- Powerful adjuvant in vaccination.

Baicalin

- Antibacterial, antiviral, anti-inflammatory, anticancer and antioxidant properties.

Vitamins B6, B12 and Biotin:

- Necessary for the normal functioning of the immune system.

Selenium

Regulatory activity : initiates the immune response and prevents chronic inflammation.

Dosage :

Cats: ½ tablet a day.

Dogs and puppies:

- 1 tablet/10 kg of body weight per day
 - Over 40 kg of body weight, take 4 tablets per day.
- Palatable tablets. Can be chewed or crushed.

LACTADIET® FOR CATS WITH COLOSTRUM

Instant breast milk substitute enriched with nutrients that aid the young animal's development during the early weeks after birth through to weaning.

Presentation
Box of 40 Sachets
 300gr

Ingredients

- Linoleic acid **27.1 mg**
- Linolenic acid **14.1 mg**
- Omega 3 (EPA+ DHA) **7.50 mg**
- Colostrum **7.50 µg**
- Vitamin K **2.83 µg**
- Calcium **59.4 mg**
- Phosphorus **41.9 mg**
- Additives per sachet:
- Vitamins:**
- Vitamin A **113 UI**
- Vitamin D3 **19.0 UI**
- Choline chloride **4.50 UI**
- Taurine **3.80 mg**
- Vitamin E **1.90 mg**
- Niacinamide **1.20 mg**
- Vitamin C **750 µg**
- Calcium pantothenate **410 µg**
- Vitamin B2 **300 µg**
- Vitamin B1 **150 µg**
- Vitamin B6 **110 µg**
- Folic acid **24.0 µg**
- Biotin **7.5 µg**
- Vitamin B12 **7.50 µg**
- Trace elements:**
- Zinc **1.5 µg**
- Iron **750 µg**
- Manganese **600 µg**
- Copper **110 µg**
- Selenium **3.80 µg**

Indications

- Lactadiet®** For Cats With Colostrum provides nutrients that:
- Aid the development of orphaned newborns that are unable to suckle or have other problems relating to milk feeds.
 - Aid the development of brain and eye tissue.
 - Support the immune system

FEATURES

Colostrum - Provides essential nutrients, antioxidants and antibodies to support the immune system and promote healthy growth in newborns.

Omega-3 and -6 fatty acids - Helps in newborns' development, supporting brain and nervous system growth, immune function, and overall cellular structure. Omega-3s, like DHA, aid in brain and vision development, while Omega-6s help regulate inflammation and support skin health.

Vitamins and Minerals - These micronutrients are essential for proper development and functioning of various body processes. They support growth, metabolism, and overall health of the newborn.

Taurine - Amino acid essential for the normal functioning of the heart muscle, vision and reproduction in cats. It is also necessary to form bile salts that aid in digestion.

Dosage :

Baby animal age	Cats aged 1-15 days	Cats aged 15-45 days	Ferrets aged 1-7 days	Ferrets aged 7-15 days	Ferrets aged 15-45 days*
Number of daily intakes	6-10	4-6	5	5	5
Total volume (ml/day)	20-40 ml	40-100 ml	3 ml	4-8 ml	8-12 ml

*From 45 days of age, and until the end of weaning, the number of daily meals and the amount of milk substitute will be set as needed.
